SOLE CREPE

KVPL's internationally recognized processing centres viz- Dewalakele and Panawatte are specialized in Sole Crepe manufacture, and produce over 500 metric tons annually. Our Sole Crepe is manufactured from clean pure, white latex coming from FSC certified Rubber plantations and processed at factories which complies with FSC Chain of Custody.

Natural Rubber Sole Crepe has been tried and tested for many decades and has been accepted as the most suitable material for manufacture of shoes used in icy surfaces.

Sole Crepe is produced in three different textures, namely, SMOOTH, PEBBLY & RIBBED, and comes in thicknesses ranging from 3mm to 15mm. Coloured Sole Crepe can be produced to match customer requirements.

SMOOTH

PEBBLY

RIBBED

Latex Crepe

We produce FSC certified Latex Crepe. It is used in high end medical equipment, baby teats etc, which come in direct contact with the human body and in the adhesive industry. Latex Crepe and Sole Crepe of Sri Lanka origin is probably the most unadulterated natural rubber product made for human use, and is manufactured after reducing the protein level naturally present in the rubber to the very minimum and free of leachable chemicals.

Centrifuged Latex

KVPL is also capable of producing FSC certified centrifuged latex in our production facility which has FSC chain of custody.

Skim Crepe

Skim crepe is manufactured in our dedicated processing centre using the serum coming out of Centrifugation process.

Scrap Crepe

Scrap Crepe is manufactured by mixing curly scrap and cup lumps. This is our equivalent to TSR 20, but contains far less dirt content.

KVPL AT A GLANCE

Kelani Valley Plantations, PLC (KVPL) established in 1992 owns and manages approximately 13,000 hectares of plantation land, annually producing approximately 05 million kgs of Tea and 03 million kgs Rubber. Recently KVPL ventured into commercial Citrus-orchard cultivation.

The Company provides direct employment to 10,000 people and nurture a resident population of around 38,000 people. Our Company is a member of Hayleys Group of Companies, a highly diversified local conglomerate with world-wide business interests.

KVPL consists of ten Rubber plantations covering an extent of 4500 hectares all of which have obtained Forest Stewardship Council (FSC) certification. Two of our processing centres have obtained FSC Chain of Custody (COC), and we produce 2.5 million Crips. We are also a signatory to Scrap Crips and Latex Crips in our processing centres. Sustainable Rubber Initiative (SMRI)-sponsored by International Rubber Study Group.

As a business philosophy we believe in sustainable Agriculture, this is part of our rubber farming will carry organic application (EU and USDA - NOP), and certified centrifuge CPO, Global Organic Latex Standard, and certified centrifuge Latex. Sole Crips and Latex Crips in our processing centres.

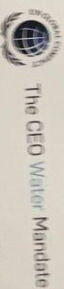

OUR COMPANY

SUSTAINABILITY

In 2006 the Company became a signatory to the United Nations Global Compact Charter (UNGC), and in 2008 we became a signatory to the United Nations CEO's Water Mandate.

The development of the plantation community has been a major component in the KVPL management strategy. In support of this policy, in 2006 KVPL launched a multi-dimensional initiative branded as "A Home for Every Worker". This programme addresses the long-term environmental, health & nutrition, community capacity building and the empowerment of youth in the KVPL plantation community. It is an on-going project designed to uplift the quality of life of the community within the KVPL plantations. This initiative has received many national and international accolades.
